

PRODUCT DATA SHEET

PRODUCT : **AIRBLISS URINAL DRAIN CLEANER**

VERSION No. : **1.0**

DATE: **23-10-2025**

Introduction:

Traditionally urinal drainage cleaners are either high acidic or basic and corrosive in nature. These cleaners will clear a clog quickly, but it can also damage the urinal drain pipes. It is now become imperative to use non corrosive urinal drain line cleaners.

AIRBLISS URINAL DRAIN CLEANER is a specially formulated bio-enzymatic cleaner designed to effectively clean, deodorize, and maintain urinal drains and surrounding surfaces. The product utilizes a blend of **naturally occurring, non-pathogenic microorganisms and enzymes** that break down organic deposits such as uric acid, scale, and soap scum — preventing foul odor and drain blockages.

Benefits:

- **Bio-Enzyme:** Contains specialized enzymes that digest uric salts, organic waste, and other odor-causing compounds.
- **Eco-Friendly:** 100% biodegradable formulation — safe for users and the environment.
- **Odor Control:** Eliminates unpleasant urine odors at the source.
- **Prevents Blockages:** Regular use maintains free-flowing drains.
- **Non-Corrosive:** Safe on plumbing and all urinal surfaces (ceramic, stainless steel, etc.).
- **Chemical-Free Cleaning:** No harsh acids or alkalis — suitable for regular maintenance

Application Conditions:

Malodor control and drainage cleaning
