

PRODUCT DATA SHEET

PRODUCT	:	AIRBLISS™ FLOOR CLEANER
VERSION No.	:	1.0
		DATE: 14-05-2025

Introduction:

- Traditionally the floor cleaners are phenolic based or halogen based, these cleaners when washed with water lands up as sewage causing upset in the sewage treatment system. Thus, affecting the water bodies and the environment. It is become imperative to work with nature's workhorses, microorganisms, to bring back the balance and sustainability.
- AIRBLISS™ FLOOR CLEANER** is an environmentally friendly, biodegrading product used for domestic as well as institutional floor cleaning applications. The bacterial consortium in **AIRBLISS™ FLOOR CLEANER** ensures surface free of oil and food contaminants. It ensures removal of malodor generated from food and oil contaminants and avoids dust sticking to the surface.

Benefits:

- Cleans any surface
- Highly effective, broad spectrum organic and inorganic degradation capabilities.
- Deep penetrating capabilities

Application Conditions:

- Malodor control and surface cleaning.
- Mix 50–70 mL of Airbliss Floor Cleaner in a 5-litre bucket of water.
- This dilution is suitable for cleaning an area of approximately 1000 sq. ft.
