

PRODUCT DATA SHEET

PRODUCT	: AIRBLISS U BLOCK ACTIV	
VERSION No.	: 1.0	DATE: 23-10-2025

Introduction:

The urinals consume lots of water for cleaning which lands up into STP/ETP. The urine itself contains more than 95% water. Thus, there is a huge wastage of fresh/recycled water to keep the urinals clean.

AIRBLISS U BLOCK ACTIV (Special Bio-blocks for Malodor control) is a Bio-block of specially selected multiple strains adept in urine Malodor management. Urine contains uric acid which is the main cause of malodor and stain. **AIRBLISS U BLOCK ACTIV** is a bio-block which eats away the malodor forming compounds and degrades uric acid, thereby imparting freshness and deep clean. Thus, making urinals waterless.

Benefits:

- Degrades and eliminates urine-based malodor generating compounds.
- Deep penetrating capabilities.
- Degrades yellow stains.

Application Conditions:

- Malodor control in urinals.
