

PRODUCT DATA SHEET

PRODUCT	:	AIDFERM BREW AF-L
VERSION No.	:	1.0
		DATE: 30-05-2024

Introduction:

AIDFERM BREW AF-L is a user-friendly water-based antifoam designed to control foam produced in Kettle and fermenter.

AIDFERM BREW AF-L is a food grade polydimethylsiloxane-based product. It is an inert polymer, which is highly effective in foam suppression.

Benefits:

- Quick antifoaming performance.
- Easily dispersed as supplied.
- Miscible in water.
- Increased Kettle utilization
- Increased Fermenter Utilization.
- Preservation of Foam positive proteins
- Increased alpha-acid utilization
- Elimination of over foaming problems
- Optimized CO₂ Recovery
- Enhanced vessel cleaning

Dosage & Application Conditions:

- Beer Processing – The optimum treatment rate for **AIDFERM BREW AF-L** depend on beer type, vessel dimension, and point of application but it is typically in the range of 2.0 – 10 ml per hectoliter

AIDFERM BREW AF-L has an effective defoaming ability (Time) of < 20 sec @ 25 – 50ppm in 1000ml foam volume of density $\approx$ 0.02 g/ml.

Storage Conditions and Packaging:

- **AIDFERM BREW AF-L** MUST BE STORED at temp. 25 $\pm$ 5°C and 35 $\pm$ 5% humid conditions
- It is best if used before 12 months from date of manufacturing.
- It is available in 25 KGs HDPE Cans.

The information provided above is to the best of our knowledge and there may be need to optimize at the plant level. We do not take the legal responsibilities about any of the above information.
