

PRODUCT DATA SHEET

PRODUCT : **AIDFERM[®] YB 065**

VERSION No. : **1.0**

DATE: 06-05- 2025

Introduction:

AidFerm[®] YB 065 is an optimized formulation of Biochemical and Nutrients to improve the fermentation of Beer. **AidFerm[®] YB 065** supplements a series of important nutrients and bio-factors. They are:

- Di-Ammonium Phosphate
- Inactivated Yeast
- Thiamine, Riboflavin, Folic Acid, Vitamin A, Iron Vitamin C & Calcium pantothenate.

In the present scenario, where the Breweries are compelled to work under best of efficiencies due to competitive atmosphere in the industries, new technologies are most sought after.

One such technology is to improve the fermentation quality. In this effort, industries are opting to use yeast cultures which are designed to produce quality beer.

These cultures being much specialized tend to be very fastidious with regards to growth conditions and nutrient requirements.

AidFerm[®] YB 065 supports yeast to produce quality beer with appropriate fermentation attenuation.

Benefits:

- Increases the cell viability by 11%
- Ensures vigorous yeast fermentation and thus prevents the growth of contaminating organisms which may produce off flavor in the beer.
- Fermentation time reduction by 02 days.

Application Conditions:

Under normal fermentation conditions of pH 3.2-3.4 & temperatures of 10-30 °C.

AidFerm[®] YB 065 is effective at concentrations of 15 – 75 g/HL wort.

Storage Conditions & Packaging:

AIDFERM[®] YB 065 MUST BE STORED at temp. 25±5°C and 35±5% humid conditions

It is best if used before 12 months from date of manufacturing.

It is available in 25kg PP Bags.

The information provided above is best of our knowledge and there may be need to optimize at the plant level. We do not take legal responsibilities about any of the above information.
