

PRODUCT DATA SHEET

PRODUCT	: FLOCAID [®] S	
VERSION No.	: 4.0	DATE: 04-03-2026

Introduction:

- **FLOCAID[®]S** is purified isinglass in soluble powder form.
- It is added to beer at the end of maturation 24 hours before filtration to speed up Yeast flocculation and improve filtration by removing yeasts and protein particles.
- **FLOCAID[®]S** is prepared with food grade acid, dispersal agent and preservative (Sulphur dioxide) already blended. The active component of **FLOCAID[®]S** is isinglass (collagen). It is derived from the swim bladder of fish. Processing into finished form involves a regime of rigorous washing and sterilization, followed by drying and milling.
- Collagen exists in solution as tightly bound triple helix strands which possess both positive and negative charged sites along their length. The amino acid make-up of collagen, and specifically the high proportion of proline and hydroxyproline, contributes to its greater ability to remove both yeasts and proteins very effectively.
- The yeast flocculation places an important role in Normal and high gravity brewing. FlocAid[®] S is an isinglass fining enables speedy and compact flocculation of dead yeast reducing beer losses up to 2%. Thus, improving process efficiency.

Benefits:

- Efficient clarification reduces flocculation time. Hence Lower Total process times. Capacity enhancement of Fermenters. No additional centrifuge required.
- Very smooth action and not associated detrimental flavor changes in Beer. Lower use of Beer stabilizer compared to beers without treatment of FlocAid[®] S.
- Reduction of use of filter aids with increased filter throughput. Cost saving due to lower KG consumption.

Storage Conditions and Packaging:

FlocAid[®] S MUST BE STORED at temp. $25\pm 5^{\circ}\text{C}$ and $35\pm 5\%$ humid conditions.

It is best if used before 18 months from date of manufacturing.

Note: Please note that recommended storage conditions must be strictly followed.

It is available in 25kg HDPE Drums.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016) FSSAI LICENSE NUMBER – 10015043001372.

Commission Directive 2007/68/EC exempts isinglass from having to be mentioned on labels when used to clarify beer or wine.

FlocAid[®] S can be used as a processing aid as it meets the requirements of EU General Food Law (Regulation (EC) No 178/2002 (as amended)).

The information provided above is to the best of our knowledge and there may be need to optimize at the plant level.
