

PRODUCT DATA SHEET

PRODUCT	: GRISTSOLUBAID	
VERSION No.	: 3.1	DATE: 01-04-2018

Introduction:

With the increase in pressure of economics in the brewing industry, breweries are exploring the opportunity of using cheaper raw materials like broken rice, maize, sorghum etc. as grist, upto 25%.

GristSolub Aid is used to gelatinise and solubilise starch present in the grist. It is a high temperature stable endo-amylase derived from a selected strain of *Bacillus licheniformis*.

It is an extracellular enzyme which randomly hydrolyses alpha-1,4 bonds in amylose and amylopectins.

GristSolub Aid is a brown coloured liquid with specific gravity of 1.10 to 1.2g/mL, which is fairly water soluble.

Benefits:

- Rapid reduction in wort viscosity.
- Complete solubilisation of grist starch.

Application Conditions:

- Optimum Parameter For GristSolub Aid Are:
 - a) Slurry Preparation:
 - I. GristSolub Aid @:0.5-0.75kg per ton dry starch.
 - II. Free calcium: 70ppm.
 - III. pH : 6-7
 - IV. % DS : 20-30%.
 - b) Liquification:
 - I. pH = 5.0 -7.0 Iodine Staining: Light purple Brown.
 - II. % DE = 16 – 20 in 90-120 min
 - III. % DS = 25-30%.
 - IV. Temperature ≥90 °C.

Safety and Handling

Gristsolub Aid is a non inflammable liquid, safe to use and easy to handle under standard guidelines of Good Manufacturing Practices. In case of spillage, wash thoroughly with water..

Storage Conditions and Packaging:

- GRISTSOLUB AID MUST BE STORED at temp. $25\pm 5^{\circ}\text{C}$ and all humid conditions
- It is best if used before 12months from date of manufacturing.
- It is available in 25 kgs HDPE cans.

All our products, conform to the standard FSSR, 2011 (The Food safety and standard regulation, 2011 as amended by Regulations, 2016)
