

PRODUCT DATA SHEET

PRODUCT	: MASHAID NP	
VERSION No.	: 1.0	DATE: 29-07-2025

Introduction:

MASHAID NP is a liquid, food-grade **neutral endo-protease** developed specifically for use in brewing applications. It hydrolyzes haze-forming proteins in beer, enhancing colloidal stability without affecting taste, foam, or clarity.

MASHAID NP also raises FAN levels. This is useful if you're working with poorly modified malt or adjunct. Normal malt solubilizes a maximum of 30-40% of the protein. **MASHAID NP** can bring solubilized protein levels as high as 40-50%.

Benefits:

- Improves the health of your yeast and ensures consistent fermentation performance
- Generates more FAN to increase levels in the wort.
- Improves the clarity of your beers.
- Avoid off-flavors in your final beer

Application Conditions:

- Dose rate of 300-600 g/ton of Grist depending on protein content and desired stabilization level. Dosage to be optimized based on pilot trials and haze sensitivity of the beer.
- Temp. Range 50-65 °C and optimum temp. 60 °C.
- pH range 3.5-5.5 and optimum pH 4.0

Storage Conditions and Packaging:

- **MASHAID NP** MUST BE STORED at temp. 25±5°C and 35±5% humid conditions
- It is best if used before 12 months from date of manufacturing.
- It is available in 25 KGs HDPE cans

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)
