

PRODUCT DATA SHEET

PRODUCT	: MASHAID™ PAG	
VERSION No.	: 4.1	DATE: 01-04-2018

Introduction:

In a competitive brewing environment and with the present varying quality of malt, it is a challenge to the brewer to extract the maximum solubles in the wort, from the grist.

Considering the fact that brewers has switched over to use non sugar adjuncts such as broken rice/Rice flakes/Barely/white sorghum, 100% to ensure timely saccharification, lautering and fermentation is a challenge. MashAid™ PAG helps in overcoming such challenges.

MashAid™ PAG is an optimum composition of amylases, proteases and beta glucanase, to improve extraction efficiencies.

Benefits:

- MashAid™ PAG reduces the viscosity by around 0.3cpu, by degrading beta glucan and xylans in the malt, thereby improves Lautering
- Increases the wort extract by 2-5%
- Increases the free amino nitrogen content
- Extremely cost effective
- Easy to use

Application Conditions:

- Dose rate of 2-6 g/HL beer
- Add to Mashton before commencement of Programme Temperature mashing
- Optimum temp. 60 °C. Optimum range 50-65 °C
- Optimum pH 4.0 Optimum range 3.5-5.5

Storage Conditions and Packaging:

- It is best if used before 12 months from date of manufacturing
- It is available in 25 KGs HDPE Drums.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)
