

PRODUCT DATA SHEET

PRODUCT	: TAN SHINEAID	
VERSION No.	: 2.0	DATE: 04-03-2026

Introduction:

TAN SHINEAID is a high molecular weight polymer and a natural Gallo tannin, food grade, hydrolysable tannic acid specially purified for brewing applications. TAN SHINEAID virtually removes all peptides which may cause haze and or particle formation during storage. TAN SHINEAID was developed for haze free stabilization of the beer. No additives or preservatives added in **TAN SHINEAID**.

TAN SHINEAID is a 100% natural material extracted from renewable plant material.

Specification of **TAN SHINEAID**.

▪ Appearance:	light brown free flowing powder.
▪ Odor:	odor less.
▪ Taste:	slight astringent taste; tasteless at normal dosage levels in beer.
- Purity:	min. 98 %
- Gallic acid	max. 0.1%
- Moisture:	max. 10 %
▪ pH (5 % in water):	2.0 – 4.0.
▪ Solubility in hot H ₂ O:	Soluble.
▪ Heavy metals:	max. 20 ppm

Benefits:

- TAN SHINEAID is typically used at the end of the brewing process to improve colloidal stability and shelf life.
- When used just before filtration, it reacts primarily with the acid SH-group containing proteins by adsorption and precipitation. The formed **TAN SHINEAID** - protein complexes are removed by filtration.
- TAN SHINEAID is added to the unfiltered matured beer after the removal of YEAST and 1 hour before filtration at a beer temperature of -1°C. **TAN SHINEAID** selectively and quickly removes haze forming proteins which improved the Colloidal stability and shelf life of beer in trade.

Application Conditions:

TAN SHINEAID is typically added as a 5-10% solution mixed with unfiltered matured beer at -1°C through a dosing vessel system with a positive displacement pump to the UT/CCFV containing the beer to be treated (Unfiltered matured beer). Before dosing **TAN SHINE AID**, remove the yeast completely from the CCFV/UT. Dosing to be done 1 hour before starting up of filtration. Rouse the UT/ CCFV after dosing of **TAN SHINE AID** with CO₂ for 3 minutes for homogenization.

- **TAN SHINEAID** dosage levels are 1-2 g/hl for Matured beers.

Storage Conditions and Packaging:

- **TAN SHINEAID** MUST BE STORED at temp. 25±5°C and 35±5% humid conditions
 - It is best if used before 18 months from date of manufacturing.
- Note:** Please note that recommended storage conditions must be strictly followed.
- It is available in 25KG HDPE Bags/Drums.
 - Storage of **TAN SHINEAID** open to the atmosphere can result in moisture uptake from the surroundings. Therefore, reseal the inner plastic bag and keep the lid on the fiber drum if **TAN SHINEAID** not in use.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016). FSSAI LICENSE NUMBER – 10015043001372.

The information provided above is to the best of our knowledge and there may be need to optimize at the plant level.
