

PRODUCT DATA SHEET

PRODUCT	: GistADD-HST	
VERSION No.	: 1.0	DATE: 01-04-2021

Introduction:

Due to rapid improvement in the sugar factories resulting in varied grade molasses quality being made available to the distilleries. In this effort, industries are opting to use yeast cultures that are high alcohol/sugar resistant to improve the fermentation efficiencies.

GistADD-HST is specifically selected high alcohol yeast, resistant to high temperature, alcohol and acid, and can be widely applied in the alcohol; potable spirit brewing that adopts starch bearing materials as dry sweet potato, maize, rice, cassava, sorghum, etc.

GistADD-HST is suitable for alcohol and fuel ethanol production in the method of fermentation with the characteristics of strong reproductive ability, high fermentation speed, high tolerance to high ethanol concentration, etc.

The product can shorten the fermentation time, and realize the fermentation of alcohol with high concentration.

Sugar Tolerance:

GistADD-HST is tolerable to 30% Sugar solution for 6 hours with cell viability of 87%.

Alcohol Tolerance:

GistADD-HST is tolerable to 12% alcohol for 6 hours with cell viability of 75%.

Propagation in culture tank:

Propagation in culture tank when the equipment and process allow, on the basis of strictly controlling bacterial infection and providing the yeast with the required nutrition, inoculate to ferment after culturing for 8-10 hours, so as to relatively reduce the yeast consumption. In consideration of the aging and degeneration of yeast in the culture process, the optimal inoculation replacement cycle shall be 72 hours.

Dosage:

0.4 to 0.6 kg/T of dry starch / 05-06 Kg per lakh liters of wash Direct or inoculate add yeast in fermentation tank (Batch fermentation) Each litre of mash is inoculated with 1.0 to 1.2% of GistADD-HST, and the initial cell count of fermentation mash reaches 5 million/ml.

Storage Conditions & Packaging:

GistADD-HST MUST BE STORED at low temperature and dry place in Vacuum Aluminium foil packaging.

It is best if used before 24 months from date of manufacturing.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)
