

PRODUCT DATA SHEET

PRODUCT	: SACCARID GL	
VERSION No.	: 1.0	DATE: 01-04-2019

Introduction:

In the present scenario of the Alcohol industry, with governments allowing 5% Ethanol inclusion in petrol and growing inflation in crude price globally, there has been a growing demand for Ethanol. This demand is being catered to by molasses Ethanol. For portable alcohol, the industry is looking at grain alcohol.

New technologies are being most sought after, due to rapid improvement in the distilleries resulting in multiple stock processing. There is thus an increased usage of varied grade and type (conventional and unconventional) of grains, based on availability to the distilleries in a highly competitive atmosphere. In such an atmosphere there is a great emphasis on improving Saccharification. Saccar Aid GL is an improved Saccharifying enzyme.

Sacchar Aid GL is an exo-amylase derived from a selected strain of *Aspergillus niger*. It is an extra-cellular enzyme which hydrolyses alpha-1,4- bonds in amylose and alpha 1- 4 & alpha 1-6 bonds in amylo-pectins, from non-reducing end of the polymer, producing D- glucose. Thus helps in rapid hydrolysis of amylose and amylopectin to D-glucose.

Sacchar Aid GL is a dark brown coloured liquid which is freely water soluble

Application Conditions:

Optimum parameters using Sacchar Aid GL is:

a) Saccharification:

- i) Sacchar Aid GL @: 0.4 to 0.8 liter per ton of starch
- ii) Time: 36min -64hrs
- iii) pH : 4.5-5.5
- iv) % DE : 18-25%
- v) Temperature: 30-45° C

b) Fermentation and Saccharification:

- i. Temperature : 28-32 C (83-90 F)
- ii. Fermentation time: 36-64hrs
- iii. pH = 4.2-4.5

Safety and Handling:

Saccar Aid GL is non inflammable, safe to use and easy to handle under standard guidelines of Good Manufacturing Practices. In case of spillage, wash thoroughly with water.

Storage Conditions and Packaging:

Saccar Aid GL is available in 25 kg HDPE cans. Under a cool and dry environment can be stored for upto 12 months from the date of manufacturing

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)

The information contained herein is true and accurate to the best of our knowledge and is offered in good faith. Recommendations are to be optimized at every stage since the conditions and method of use, are specific and beyond our control.
