

PRODUCT DATA SHEET

PRODUCT	: SOLUBAID DXP	
VERSION No.	: 1.0	DATE: 01-04-2021

Introduction:

SolubAid DXP is a fungal Dextranase produced by submerged fermentation of selected strain of *Chaetomium erraticum*. **SolubAid DXP** is an Endo-Dextranase which Hydrolyses 1, 6-alpha-glucosidic linkages in Dextran.

SolubAid DXP is stable at pH range of 3-7 and at temperature up to about 70°C and preferred conditions are of pH of 5-6 and temperature of 50-60°C

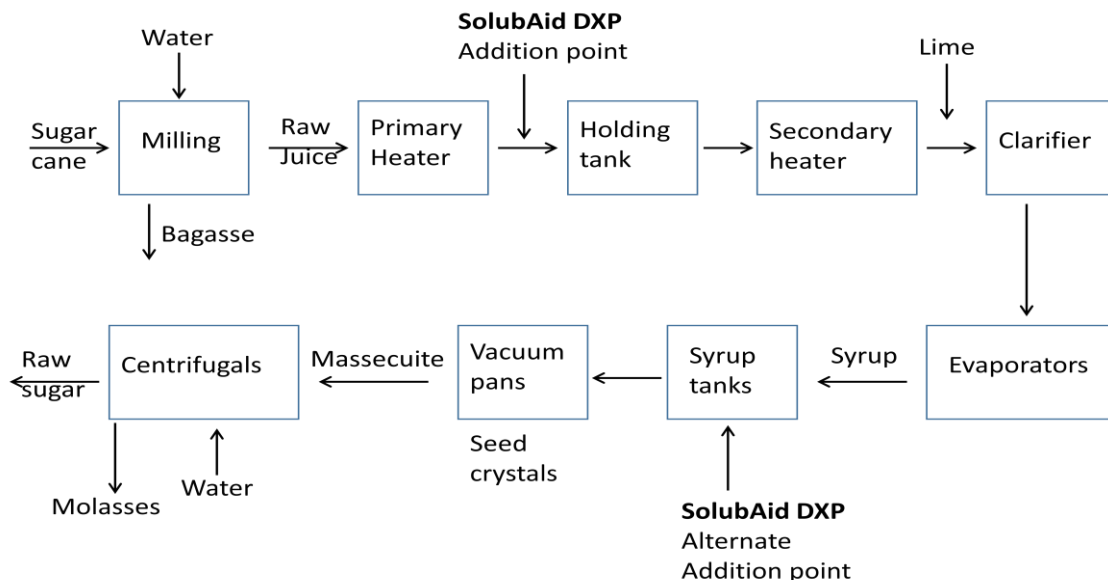

Sugar Process with SolubAid DXP application

Dextran is a high molecular weight polysaccharide consisting of glucose units joined together mainly by 1-6 alpha linkages. Dextran is formed due to *Leuconostoc* infection occurs on tissue damage to the crop especially under humid climatic condition.

Dextran in sugar juice at 1000ppm (based on Brix) will increase the viscosity of the sugar juice, Syrup, Massecuite and molasses, there by hampering juice clarification, sucrose, crystallization and purging process and crystal elongation, may occur which further reduces molasses exhaustion. As a result, factory capacity and yield are lowered.

By adding Solubaid DXP to contaminated sugar juice or Syrup, the large Dextran molecules are broken down into smaller oligosaccharide. There by reducing high viscosity.

Typical cane sugar mill flow sheet:

Benefits

- Reduces the large Dextrin molecules into short fragments.
- It reduces the higher viscosities in high Brix Process materials or sugar juice.
- Reduces the froth of the processing Juice.
- Reduces the Negative influence on the sugar process.

Application Conditions

SolubAid DXP is suitable for use in Sugar Industry to break down the Dextran from sugar syrup or Juice.

SolubAid DXP is added to the Dextran containing raw juice at 1-3ppm on Juice volume depending upon the temperature and residence time

Storage Conditions and Packaging:

SolubAid DXP MUST BE STORED at temp. 25±5°C and 35±5% humid conditions

SolubAid DXP is available in 25 kg PP Bags. Under a cool and dry environment can be stored for up to 12 months from the date of manufacturing.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)

The information contained herein is true and accurate to the best of our knowledge and is offered in good faith. Recommendations are to be optimized at every stage since the conditions and method of use, are specific and beyond our control.
