

PRODUCT DATA SHEET

PRODUCT : AIDFERM® YW 032

VERSION No. : 1.0

DATE: 01-02- 2022

Introduction:

AidFerm® YW 032 is an optimized formulation of Biochemical and Nutrients to improve the fermentation of wine. **AidFerm® YW 032** supplements a series of important nutrients and bio-factors. They are:

- Di-Ammonium Phosphate
- Inactivated Yeast
- Thiamine, Riboflavin, Folic Acid, Vitamin A, Iron Vitamin C & Calcium pantothenate.

In the present scenario, where the wineries are compelled to work under best of efficiencies due to competitive atmosphere in the industries, new technologies are most sought after.

One such technology is to improve the fermentation quality. In this effort, industries are opting to use yeast cultures which are designed to produce quality wine.

These cultures being much specialized tend to be very fastidious with regards to growth conditions and nutrient requirements.

AidFerm® YW 032 supports yeast to produce quality wine with appropriate fermentation attenuation.

Benefits:

- Increases the cell viability by 11%
- Ensures vigorous yeast fermentation and thus prevents the growth of contaminating organisms which may produce off flavor in the wine.
- The alcohol content increases by 0.8 % thus decreasing the required sugar by 1.5%.
- Fermentation time reduction by 02 days.

Application Conditions:

Under normal fermentation conditions of pH 3.2-3.4 & temperatures of 10-30 °C.

AidFerm® YW 032 is effective at concentrations of 15 – 75 g/HL wort.

Storage Conditions & Packaging:

AIDFERM[®] YW 032 MUST BE STORED at temp. $25\pm 5^{\circ}\text{C}$ and $35\pm 5\%$ humid conditions

It is best if used before 12 months from date of manufacturing.

It is available in 25kg HDPE Drum.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)
