

PRODUCT DATA SHEET

PRODUCT : **ExtractAid 03**

VERSION No. : **1.0**

DATE: 01-02-2022

Introduction

Complete extraction of pulp and colour is highly desirable for making of quality wine and optimal production efficiency.

It is a challenge for the wineries to extract the maximum colour and pulp from the grapes / fruits for good wine making.

ExtractAid 039 is pectinase enzyme-based product which helps in overcoming such challenges. Pectinase (hydrolyze α 1-4 galacturonic bond) can break the cell wall of fruit and reduce viscosity of pulp.

Benefits

1. Break the fruit cell wall, release juice, and increase the yield by minimum 10%.
2. Reducing viscosity of juice.
3. Speeding up ultra-filtration, and decreasing washing times of ultra-membrane.
4. Effectively preventing producing muddiness, and guaranteeing stockpile period and stability.

Viscosity Reduction by use of EXTARCTAID 039 in 10% pectin

Time (Minutes)	% Reduction in Viscosity of 10% pectin
5	29.44
10	38.63
15	46.04
20	50.04

Application Conditions:

- Dose rate of 2-3 g/HL of fruit pulp
- pH range 4.5 – 6.5 and optimum pH 4.0
- Application temperature 15-50 °C

Storage Conditions & Packaging:

- ExtractAid 039 MUST BE STORED at temp. 25±2°C and <35% humid conditions
- It is best if used before 12months from date of manufacturing.
- It is available in 25 KGs PP Bags.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)
