

PRODUCT DATA SHEET

PRODUCT	: ExtractAid	
VERSION No.	: 1.0	DATE: 01-04-2020

Introduction:

Complete extraction of pulp and colour is highly desirable for making of quality wine from grapes and fruits and optimal production efficiency.

It is a challenge for the wineries to extract the maximum colour and pulp from the grapes / fruits for good wine making

ExtractAid is pectinase enzyme based product which helps in overcoming such challenges. Pectinase (hydrolyze α 1-4 galacturonic bond) can break the cell wall of fruit and reduce viscosity of pulp

Benefits:

1. Break the fruit cell wall, release juice, and increase the yield by minimum 10%.
2. Reducing viscosity of juice.
3. Speeding up ultra-filtration, and decreasing washing times of ultra-membrane.
4. Effectively preventing producing muddiness, and guaranteeing stockpile period and stability.

Application Conditions:

- Dose rate of 2ml/HL of fruit pulp
- pH range 3.5 – 4.5 and optimum pH 4.0
- Application temperature 15-50 °C

Storage Conditions & Packaging:

ExtractAid MUST BE STORED at temp. $25\pm 2^{\circ}\text{C}$ and <35% humid conditions

It is best if used before 12 months from date of manufacturing.

It is available in 25 KGs HDPE Cans.

All our products, conform to the standard FSSR, 2011 (The food safety and standard regulation, 2011 as amended by regulations, 2016)
